TSRI 433.1 D1

REMARKS

Claim 5 has been amended in accordance with the Examiner's helpful suggestion to indicate the sequence number ID for the recited sequences. In addition, the Examiner has requested an amendment to the Response to Notice to Comply with Requirements for a Sequence Listing entered on July 21, 2000. In that Notice, Applicants requested that the Patent Office use the computer readable form of the Sequence Listing filed in PCT Application Serial No. PCT/US95/16415. During a telephone call with Examiner Davis, Examiner Davis informed Applicants that the Patent Office is unable to gain access to that computer readable form. Examiner Davis then stated that because the Sequence Listing of United States Patent Application 08/860,232 is identical to that of the named PCT Application that Applicants allow access to the computer readable form filed in that 08/860,232 application to be used as the computer readable form of the Sequence Listing of the subject application. Applicants hereby grant that request.

Respectfully submitted,
